INTRODUCTION

Our proposal for an
Online International Collaborative
Education Program
in the Post-COVID-19 Era

Who is the program aimed at:

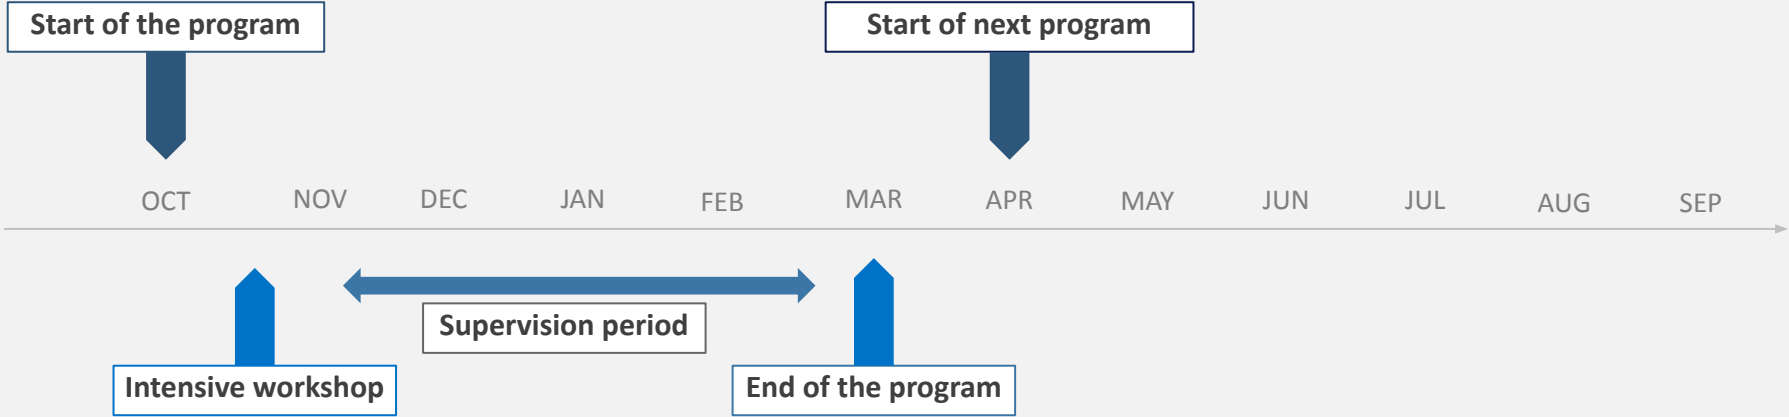

advanced undergraduate students who are writing their bachelor's thesis and graduate students of all faculties of the HeKKSaGOn Universities

→ students have to apply with a research proposal

Nature of the activities:

- 1) Intensive workshop with presentations of the students' research topics. The presentations are grouped thematically into different panels. At the end of each panel there will be a discussion and feedback round.
- 2) Individual supervision

Possible Timeframe

- facilitate a cross-university and interdisciplinary exchange
- the workshop enables students to see what kind of research programs other universities offer
- students can get assistance from teaching staff and students from other universities and disciplines
- students can widen their interdisciplinary horizon (where are connections / overlapping points)

GOALS

Thank you for your
attention!
